# Stop and Search Performance Pack

1 April 2016 to 31 March 2017

**EXTERNAL DOCUMENT**

<b>Author</b>	Senior Performance Analyst (5675)
<b>Publication Date</b>	April 2017
<b>Protective Marking</b>	NOT PROTECTIVELY MARKED

## Introduction

This report is intended to provide some detailed analysis into Stop Searches conducted by Dorset Police.

The report is designed to provide sufficient information to highlight areas of potential concern or interest. It has been developed to support Dorset Police in the delivery of the Equality Standard for the Police Service which provides a system for monitoring performance and assessing progress on how the priorities of the Equality, Diversity and Human Rights Strategy for the Police Service are being delivered.

Rates per 1,000 population and disproportionality ratios for Stop Search are based on 2011 Census data by ethnicity. The population profile of Dorset used in these calculations is shown below.

## Population Profile

	Bournemouth and Poole Division		Dorset County Division		Force	
	2001 Census	2011 Census	2001 Census	2011 Census	2001 Census	2011 Census
White	283,896	289,450	378,380	394,350	662,276	683,800
White Non British	9,915	20,870	7,683	9,967	17,598	30,837
Mixed	2,871	6,107	1,940	3,400	4,811	9,507
Black & Black British	943	2,284	579	924	1,522	3,208
Asian & Asian British	2,932	10,342	1,754	3,833	4,686	14,175

## **Delivering the Police and Crime Plan Priorities**

The Police and Crime Commissioner and Dorset Police agree a number of Policing Priorities each year. These are laid out in our Police and Crime Plan, which also sets out how Dorset Police organizes itself and its activity in order to achieve these priorities. The 2013-2017 Police and Crime Plan is a public document and is available from the following link:

<https://www.dorset.pcc.police.uk/delivering-the-police-and-crime-plan/>

### **Our Policing Priorities 2016/17**

- Reduce the number of victims of crime and anti-social behaviour
- Reduce the number of people seriously harmed in Dorset
- Help protect the public from serious threats (local, regional and national) to their safety including organised crime and terrorism
- Reduce re-offending
- Increase peoples satisfaction with Policing in Dorset
- Support neighbourhood policing that is appropriate for both rural and urban communities in Dorset

### **Performance Pack Data**

Please note that due to a change in recording system, 2016/17 is a baseline year in respect of stop search data and consequently no comparison with previous years is available within this report.

## Object of Search

The tables below provide details about the purpose/object of search of those stop searches conducted during 2016/17, between 1 April 2016 and 31 March 2017. The first table provides the Force level overview, whilst the second table considers the data broken down by the ethnicity of the person searched. Due to a small element of data quality discrepancies whereby a person can be listed with more than one ethnicity on the Force's new records management system, some duplication of stop searches results when the data is broken down by the ethnicity of the searched person.

	Article for use in theft	Controlled drugs	Firearms	Not Recorded	Offensive weapons	Other	Stolen goods
<b>Total</b>	221	2,192	14	43	168	322	284

Total stop searches	Total Arrests	Arrest Rate	Positive Searches	Rate of Positive Searches
3,244	497	15.3%	1,316	40.6%

Between 1 April 2016 and 31 March 2017, there have been a total of 3,244 stop searches recorded within Dorset; the majority of which have been undertaken with the purpose of finding controlled drugs (68% of the total). In total, 497 arrests resulted from the stop searches, equating to an arrest rate of 15.3%. Although an arrest was not always made, in 41% of cases, the search was positive as it resulted in some further action, e.g. a community resolution or penalty notice of disorder was issued. There were 43 stop searches in the year to date where the object of search was not recorded.

	Article for use in theft	Controlled drugs	Firearms	Not Recorded	Offensive weapons	Other	Stolen goods	Total Stop Searches
<b>Asian</b>	1	27			2	3		<b>33</b>
<b>Black</b>	3	206		2	9	13	10	<b>243</b>
<b>Mixed</b>	1	64		1		7	6	<b>79</b>
<b>Not stated</b>	31	283	1	4	23	51	21	<b>414</b>
<b>Other</b>		5			3	1	2	<b>11</b>
<b>White British</b>	175	1,544	11	30	117	234	232	<b>2,343</b>
<b>White Non-British</b>	16	83	2	6	15	17	15	<b>154</b>
<b>Total</b>	<b>227</b>	<b>2,212</b>	<b>14</b>	<b>43</b>	<b>169</b>	<b>326</b>	<b>286</b>	<b>3,277</b>

As the table above shows, the majority of people stop searched during 2016/17 were of White British ethnicity, accounting for 71% of total stop searches over the reporting period. Those of Black ethnicity were the largest non-White group to be stop searched, accounting for 7% of total stop searches. Any disproportionality this may indicate is discussed further on in the report under the Ethnicity section. Whilst 68% of total stop searches were completed for the purpose of finding controlled drugs, this proportion increases to 85% for searches of Black people.

## Object of Search

	Quarter 1			Quarter 2			Quarter 3			Quarter 4			Total Arrest Rate
	Stop Search Volume	Arrests	Arrest Rate	Stop Search Volume	Arrests	Arrest Rate	Stop Search Volume	Arrests	Arrest Rate	Stop Search Volume	Arrests	Arrest Rate	
Article for use in theft	51	5	9.8%	75	14	18.7%	48	7	14.6%	47	4	8.5%	<b>13.6%</b>
Controlled drugs	655	78	11.9%	618	98	15.9%	517	78	15.1%	402	68	16.9%	<b>14.7%</b>
Firearms	1	1	100.0%	1			8	4	50.0%	4			<b>35.7%</b>
Not Recorded	5			9	2	22.2%	10			19			<b>4.7%</b>
Offensive weapons	44	14	31.8%	42	13	31.0%	48	11	22.9%	34	7	20.6%	<b>26.8%</b>
Other	23	3	13.0%	36	4	11.1%	40	2	5.0%	223	21	9.4%	<b>9.3%</b>
Stolen goods	93	24	25.8%	67	15	22.4%	71	15	21.1%	53	9	17.0%	<b>22.2%</b>
<b>Total</b>	<b>872</b>	<b>125</b>	<b>14.3%</b>	<b>848</b>	<b>146</b>	<b>17.2%</b>	<b>742</b>	<b>117</b>	<b>15.8%</b>	<b>782</b>	<b>109</b>	<b>13.9%</b>	<b>15.3%</b>

As the table above shows, the arrest rate was highest at 35.7% for stop searches where the object being searched for was a firearm although there were only 14 stop searches of this type during 2016/17. The arrest rate was below the 15.3% stop search average for searches where the purpose was article for use in theft or other purpose as well as for those searches where the object of the search was not recorded. The arrest rate was particularly low in Quarter 4 at 13.9%, mainly affected by arrests for offensive weapons and stolen goods, both of which have shown a declining trend in arrest rates during 2016/17.

## Outcome of search linked to object of search?

The table below shows those searches which resulted in some form of action (i.e. the outcome was something other than 'No Further Action'). It then identifies, by object of search, whether the outcome of that search was linked to what was being searched for by the officer.

	Outcome of search linked to object of search?			
	False	True	Unknown	Total searches resulting in action
Article for use in theft	43	19	2	<b>64</b>
Controlled drugs	169	879	79	<b>1,127</b>
Firearms	6	1		<b>7</b>
Not Recorded	8		25	<b>33</b>
Offensive weapons	44	16	3	<b>63</b>
Other	128		26	<b>154</b>
Stolen goods	59	42	24	<b>125</b>
<b>Total</b>	<b>457</b>	<b>957</b>	<b>159</b>	<b>1,573</b>

As the table above shows, of the 3,244 stop searches conducted over the reporting period, 48.5% resulting in some form of action being taken as a result of the search (1,573 actual). For 957 of these searches (61%), the outcome of the search was linked to the object of search. The outcome was not linked to the object of search in 29% of cases. Whether the outcome is linked to the object of search is unknown in 10% of searches where for example, the outcome was listed as community resolution or caution, but the recording system at the time did not allow for identification of whether the community resolution or caution issued related to the object of search.

For searches where the object of search was controlled drugs, controlled drugs were subsequently found in 78% of these searches. The percentage of outcomes linked to object of search for other items is smaller by comparison with the next highest proportion being for stolen goods with 34% of outcomes being linked to stolen goods. The proportion stands at 14% for firearms searches.

## Drug Searches

As the most common reason for an officer to complete a stop search, the tables below explore the drugs stop searches in more detail, looking at the volume of stop searches for cannabis/khat searches compared with searches for other drugs, as well as including information on arrests and positive searches. Please note that more than one purpose can be selected for a stop search, so there are some records where both types of drug have been selected as the object of search.

Purpose of Search	Drugs - Cannabis/khat				
	Volume of stop searches	Arrests	Arrest Rate	Positive Searches	Rate of positive searches
Asian	15	2	13.3%	5	33.3%
Black	49	12	24.5%	21	42.9%
Mixed	28	2	7.1%	13	46.4%
Not stated	162	9	5.6%	79	48.8%
Other	1			1	100.0%
White British	786	87	11.1%	426	54.2%
White Non-British	43	4	9.3%	21	48.8%
<b>Total</b>	<b>1,084</b>	<b>116</b>	<b>10.9%</b>	<b>566</b>	<b>51.8%</b>

Purpose of Search	Drugs - Cannabis/khat; Drugs - other				
	Volume of stop searches	Arrests	Arrest Rate	Positive Searches	Rate of positive searches
Black	4	2	50.0%	4	100.0%
Not stated	3	1	33.3%	2	66.7%
White British	1			1	100.0%
<b>Total</b>	<b>8</b>	<b>3</b>	<b>37.5%</b>	<b>7</b>	<b>87.5%</b>

## Drug Searches

Purpose of Search	Drugs - other				
	Volume of stop searches	Arrests	Arrest Rate	Positive Searches	Rate of positive searches
Asian	12	5	41.7%	6	50.0%
Black	153	54	35.3%	73	47.7%
Mixed	36	5	13.9%	13	36.1%
Not stated	119	14	11.8%	40	33.6%
Other	4				
White British	751	114	15.2%	331	44.1%
White Non-British	40	10	25.0%	15	37.5%
<b>Total</b>	<b>1,115</b>	<b>202</b>	<b>18.2%</b>	<b>478</b>	<b>43.1%</b>

In terms of the drugs being searched for, cannabis/khat has been the purpose of the search in 50% of drugs stop searches during 2016/17. The rate of positive searches is at 52% for cannabis/khat, with a lower rate for those of Asian (33%), Black (43%) or Mixed ethnicity (46%). The arrest rate for cannabis/khat searches is notably higher for Black individuals at 25% compared to an average of 11%. Arrest rates for 'Drugs-other' are generally higher than for Cannabis - an average of 18% which increases to 42% for those of Asian ethnicity and 35% for Black nominals. Positive search rates for these two ethnicities are also higher than the average for Drugs - other stop searches. It is worth noting that Black nominals subject to drug-related stop searches are more likely to be searched for 'drugs-other' than 'cannabis/khat'; 153 stop searches compared to 49 stop searches respectively.

## Ethnicity of Person Stop Searched

	Total Stop Searches	Stop Searches per 1,000 popn (2011 Census)	Disproportionality Ratio	Arrests	Arrest Rate	Positive Searches	Rate of positive searches
Asian	33	2.33	0.68	8	24.2%	12	36.4%
Black	243	75.75	22.11	78	32.1%	112	46.1%
Mixed	79	8.31	2.43	10	12.7%	30	38.0%
Not stated	414			34	8.2%	136	32.9%
Other	11	4.38	1.28	2	18.2%	4	36.4%
White British	2,343	3.43		339	14.5%	976	41.7%
White Non-British	154	4.99	1.46	26	16.9%	58	37.7%
<b>Total</b>	<b>3,277</b>			<b>497</b>		<b>1,328</b>	

As the table above identifies, the lowest rate of stop searches per 1,000 resident population is for those of Asian ethnicity, with 2.33 people searched for every 1,000 Asian people resident in Dorset. With a disproportionality ratio of less than 1, this means that an Asian person in Dorset is less likely to be stop searched than a person of White British ethnicity. In contrast, the ratio of Black to White British searches between April 2016 and March 2017 is 22:1, meaning that for every White British person searched, there will be 22 Black nominals searched. Previous research from 2014/15 has identified that 48% of searches of Black people related to non-Dorset residents who are not included within the Census data from which the search rate is calculated.

The arrest rate for persons of White British ethnicity is 14.5% in 2016/17, but this increases to 32.1% for Black individuals and is also higher at 24.2% for those people of Asian ethnicity stop searched. It is also worth noting that the rate of positive searches (i.e. some further action taken as a result of the stop search) is highest for Black stop searches at 46% compared to 42% for those of White British nominals.

It is worth being aware that proposals to reduce searches for Cannabis would have the effect of worsening Dorset's disproportionality for those of Black ethnicity. The reason for this is that proportionately, a far greater percentage of White British searches are on the grounds of cannabis than for Black nominals, for whom drug searches tend to be for Other drugs, so you remove proportionately more White British stop searches from the calculation, pushing the disproportionality up further.

## Ethnicity of Person Stop Searched

Black Stop Searches	Total Stop Searches	Arrests	Arrest Rate	Positive Searches	Rate of positive searches
Bmth Central	25	4	16.0%	11	44.0%
Bmth East	94	35	37.2%	49	52.1%
Bmth North	19	6	31.6%	9	47.4%
Bridport	6			2	33.3%
Christchurch	8	1	12.5%	2	25.0%
Dorchester	12	8	66.7%	8	66.7%
East Dorset	4	1	25.0%	2	50.0%
North Dorset	7	3	42.9%	3	42.9%
Poole North	1				
Poole South	15	2	13.3%	4	26.7%
Purbeck	1				
Weymth & Portland	41	16	39.0%	18	43.9%
Unknown	10	2	20.0%	4	40.0%
<b>Total</b>	<b>243</b>	<b>78</b>	<b>32.1%</b>	<b>112</b>	<b>46.1%</b>

The table above shows that the majority of Black Stop Searches take place in one of two locations within Dorset; Bournemouth East (39%) and Weymouth & Portland (17%). Arrest rates for Black nominals are above average for Black stop searches in these two Sections, as is the rate of positive searches within Bournemouth East. In contrast, in Poole South and Bournemouth Central, the arrest rate for Black nominals stop searched is below the 32.1% average at 13.3% and 16.0% respectively, with the rate of positive searches within Poole South also being notably below average.

## Age of Person Stop Searched

Age group of person stop searched (years)	Total Stop Searches	Arrests	Arrest Rate	Positive Searches	Rate of positive searches
10-13	42	1	2.4%	10	23.8%
14-16	339	18	5.3%	95	28.0%
17	168	16	9.5%	62	36.9%
18-24	900	143	15.9%	403	44.8%
25-34	661	114	17.2%	269	40.7%
35-44	551	104	18.9%	248	45.0%
45-54	247	40	16.2%	92	37.2%
55-64	35	8	22.9%	12	34.3%
65-74	2	1	50.0%	1	50.0%
75 and over	1				
Unknown	298	52	17.4%	124	41.6%
<b>Total</b>	<b>3,244</b>	<b>497</b>	<b>15.3%</b>	<b>1,316</b>	<b>40.6%</b>

The table above shows that 18-24 year olds accounted for the largest group of people stop searched in Dorset during 2016/17; 900 stop searches equating to 28% of the total stop searches conducted over this period. This group is closely followed by those aged 25-34 years old who account for a further 20% of the total. Arrest rates among these two age groups are slightly above average with the positive search rate among 18-24 year olds also being above average. Youths aged 17 years old and under were subject to a total of 549 searches during 2016/17; 17% of the total conducted. Both arrest rates and positive search rates are below average among youths.

## Object of Search by Age of person searched

	Article for use in theft	Controlled drugs	Firearms	Not Recorded	Offensive weapons	Other	Stolen goods
10-13	7	11	1		3	14	6
14-16	32	187	1	4	15	89	11
17	12	123		3	5	20	5
18-24	49	633	4	13	44	103	55
25-34	41	465	2	11	31	53	58
35-44	42	376	3	2	27	27	74
45-54	19	155	3	6	18	7	39
55-64		26		1	4	1	3
65-74		1				1	
75 and over							1
Unknown	19	215		3	21	7	32
<b>Total</b>	<b>221</b>	<b>2,192</b>	<b>14</b>	<b>43</b>	<b>168</b>	<b>322</b>	<b>284</b>

The table above shows that controlled drugs are the most searched for item across all age groups, with the exception of 10-13 year olds. For this age group, youths have tended to be subject to a search as a result of criminal damage in the area for which they fit the description of the suspects or underage smoking.

## Stop Search Powers

The table below shows the legal powers under which the stop searches have been conducted over the reporting period.

Legal Power	Stop Search Volume
Wildlife/game powers	9
Transport Act 1968 (s 99ZB[2c])	1
Transport Act 1968 (s 99ZB[1])	1
Terrorism Act 2000 (s43)	1
Psychoactive Subs Act 2016 (s37(2))	1
PACE 1984 (s4)	4
PACE 1984 (s1)	773
PACE 1984 (32)	13
Other	34
Misuse of Drugs Act 1971 (s23);Sporting Events Act 1985 (s7)	1
Misuse of Drugs Act 1971 (s23);Road Traffic Act 1988 (s163)	1
Misuse of Drugs Act 1971 (s23);PACE 1984 (s1)	2
Misuse of Drugs Act 1971 (s23)	2,358
Firearms Act 1968 (s47)	14
Criminal Justice and PO Act 1994 (s60AA)	15
Criminal Justice and PO Act 1994 (s60)	3
	13

Between 1 April 2016 and 31 March 2017, the legal power field has not been completed in 13 cases - these are routinely reviewed and updated. The majority of searches are conducted under Section 23 of the 1971 Drugs Act (73% of the total). Any Terrorism Searches & Section 60 Searches are automatically reviewed for accuracy as their use is so rare.

## Stop Search Locations

The table below shows the location of the Stop Searches during the reporting period, broken down by Police Section. The corresponding arrests and positive search information is also included in the table below.

	Total Stop Searches	Arrests	Arrest Rate	Positive Searches	Rate of positive searches
<b>Bmth Central</b>	289	47	16.3%	116	40.1%
<b>Bmth East</b>	551	118	21.4%	262	47.5%
<b>Bmth North</b>	296	60	20.3%	144	48.6%
<b>Bridport</b>	115	15	13.0%	43	37.4%
<b>Christchurch</b>	167	28	16.8%	65	38.9%
<b>Dorchester</b>	131	23	17.6%	50	38.2%
<b>East Dorset</b>	186	16	8.6%	75	40.3%
<b>North Dorset</b>	220	15	6.8%	89	40.5%
<b>Poole North</b>	160	15	9.4%	54	33.8%
<b>Poole South</b>	394	56	14.2%	151	38.3%
<b>Purbeck</b>	64	9	14.1%	27	42.2%
<b>Weymth &amp; Portland</b>	543	84	15.5%	197	36.3%
<b>Unknown</b>	128	11	8.6%	43	33.6%
<b>Total</b>	<b>3,244</b>	<b>497</b>	<b>15.3%</b>	<b>1,316</b>	<b>40.6%</b>

During 2016/17, location details were not fully completed for 128 Stop Searches (3.9%) and therefore cannot be assigned to a specific Police Section. Where a location was specified, Bournemouth East Section completed the most stop searches (17.7% of the total, 551 searches), followed closely by 17.4% of stop searches taking place in Weymouth & Portland (543 searches). In terms of arrest rate from stop searches, East and North Dorset and Poole North are outliers with arrest rates that are notably below the Force average at less than 10%. However, the positive search rates for East and North Dorset were in line with the Force average, in contrast to a below average positive search rate of 33.8% in Poole North; the lowest across the Force.

Arrest rates within Bournemouth East and Weymouth & Portland, where a large proportion of the Stop Searches are taking place are above average, whilst the positive search rate for Bournemouth East also exceeds the Force average. It is of note that searches in Bournemouth North have both an above average arrest rate and positive search rate.

## Section Focus – North Dorset

The following tables provide data on Stop Searches conducted in North Dorset Section between 1 April 2016 and 31 March 2017. Some key points highlighted by the data within these tables are noted below:

- The arrest rate in North Dorset at 6.8% during 2016/17 was below the 15.3% Force average
- The positive search rate in North Dorset however is in line with the Force average
- 70% of stop searches in North Dorset were for controlled drugs
- The positive search rate in North Dorset reduced in Quarter 4, in line with Force performance
- 79% of Stop Searches in North Dorset during 2016/17 relate to people of White British ethnicity, although Black people are disproportionately searched at a ratio of 8.5:1 – much less disproportionate than at Force level.
- The arrest rate for Black people searched in North Dorset is much higher than average at 42.9%, but this only relates to 3 arrests from a total of 7 searches.
- The younger age profile of people stop searched in North Dorset may be contributing to its relatively low arrest rate as Force level arrests are low in volume among those under 18 and 42% of people stop searched within North Dorset during 2016/17 were aged under 18.
- Stop searches within North Dorset are concentrated in five beats; DUHB, DUJB, DUBA, DUAC and DUCB. It is of note that no arrests were made from the 44 stop searches in DUJB beat (Gillingham Town) and the positive search rate was below average at 13.6%.
